## Project Design Phase-I Proposed Solution

| Date          | 05 October 2022   |
|---------------|---|
| Team ID       | PNT2022TMID42577  |
| Project Name  | Project - AI-powered Nutrition Analyzer for Fitness Enthusiasts |
| Maximum Marks | 2 Marks   |

## **Proposed Solution:**

| S.No. | Parameter                                | Description  |
|-------|--|--|
| 1.    | Problem Statement (Problem to be solved) | Food is essential for human life and has been the concern of many healthcare conventions. Nowadays new dietary assessment and nutrition analysis tools enable more opportunities to help people understand their daily eating habits, exploring nutrition patterns and maintaining a healthy diet. Nutritional analysis is the process of determining the nutritional content of food. It is a vital part of analytical chemistry that provides information about the chemical composition, processing, quality control and contamination of food. |
| 2.    | Idea / Solution description              | The idea of the project is to build a model which is used for classifying the fruit depending on the different characteristics like color, shape, texture etc.   |

| 3. | Novelty / Uniqueness                  | Here the user can capture the images of different fruits and then the image will be sent to the trained model. The model analyzes the image and detects the nutrition based on the fruits like (Sugar, Fibre, Protein, Calories, etc.). |
|----|---------------------------------------|---|
| 4. | Social Impact / Customer Satisfaction | This project is very helpful to People. Everyone Maintaining their own diet, to manage the time.  |
| 5. | Business Model (Revenue Model)        | By using this system, the users can predict and analyze the picture of the fruits and foods. In which it results in visualizing the description of the foods taken as input.  |
| 6. | Scalability of the Solution           | By implementing this system, the people can efficiently and effectively gain knowledge about the fitness. They want and they wish to use at any time. This system can also be integrated with future technologies.                      |
